JONAS ALVES DE SENA NETO

Game Engineer | Technical Lead • Parnamirim-RN, Brazil • **jonas.dev.contact@gmail.com**

Portfolio: Jonas.Dev | **LinkedIn:** linkedin.com

PROFESSIONAL SUMMARY

Game Engineer and Technical Lead with over 3 years of experience in gameplay programming, systems architecture, and LiveOps for high-scale mobile and PC titles (+2M downloads, +270k MAU). Specialist in real-time multiplayer (Unity Netcode / Relay), advanced profiling (60% RAM reduction and Zero GC Alloc), event-driven SOLID architecture, and full release lifecycle on Google Play, App Store, and Steam.

TECHNICAL SKILLS

- **Engines & Architecture:** Unity (2D/3D), C#, .NET, SOLID Principles, Object-Oriented Programming, Design Patterns.
- **Multiplayer & Networking:** Unity Netcode for GameObjects, Unity Relay, multiplayer synchronization, JSON/Base64 serialization.
- **Performance & Profiling:** Unity Profiler, Memory Profiler (Snapshots), GC elimination (Zero GC Alloc), shader optimization.
- **Gameplay & Audio:** 3D vehicle physics, Inverse Kinematics (IK), AI (State Machines, NavMesh), Dynamic UI, FMOD.
- **LiveOps & Tools:** Firebase Crashlytics, Ad SDKs (Monetization), Git, Git Flow, Code Reviews, Designer Tooling.

PROFESSIONAL EXPERIENCE

Santos Games | **Game Engineer / Technical Lead** | Full-time | **07/2024 – Present**

Grau é Arte Online (+2M downloads, +200k MAU, +1M ads/month) | Fixa Brasil (+100k downloads, +70k MAU)

- Technical leadership and event-driven architecture (SOLID) for LiveOps mobile titles with millions of users.
- Deep performance optimization: 60% RAM reduction (1.32 GB to 0.51 GB) and up to +15 FPS gain with Zero GC Alloc.
- Real-time multiplayer using Unity Netcode/Relay; 3D vehicle physics, procedural IK.
- 30% increase in crash-free sessions via Crashlytics and +100% growth in ad revenue across updates.

Baladeira Studios | **Junior Unity Game Developer** | Freelance | **07/2024 – 01/2025**

Refúgio do Banzé (2D Mobile Tower Defense)

- Programming and refactoring user interface (dynamic UI), including dynamic progress bars and store usability.
- Development of system tools in the Unity Editor for autonomous balancing by Game Designers.
- Continuous integration of 2D art assets, animations, and audio; critical bug fixing and gameplay polish.
- Collaborative work in an agile multidisciplinary team applying Git Flow best practices and participating in Code Reviews.

DeadPixel Studios | **Unity Game Developer** | Full-time | **12/2023 – 06/2024**

Machick (Vampire survivors like release on Steam)

- Founding team member across the complete development lifecycle (conception, prototyping, production to Steam release).
- Architecture of core gameplay systems: procedural level generation, map event control, and combat mechanics.
- UI implementation and dynamic localization system (i18n) structuring for native multi-language support.
- Technical leadership in audio integration in-engine with the sound team and post-release commercial support via patches.

DeadPixel Studios | **Unity Game Developer** | Part-time | **01/2023 – 06/2024**

Eclipse: Shine of Dawn (3D Action-Adventure for PC)

- Development of enemy Artificial Intelligence from scratch, architecting behaviors via State Machine, NavMesh, and IK.
- Critical bug resolution and gameplay polishing for first Boss battle combat mechanics.
- Technical integration of dynamic audio and immersive sound effects using FMOD.
- Official studio representation and game presentation to the public and press at Brasil Game Show (BGS 2023).

EDUCATION

- **Bachelor's Degree in Information Technology** — Federal University of Rio Grande do Norte (UFRN) | **2021 – 2027**
- **Extension / Training in Game Development** — UFRN | **03/2020 – 09/2020**
